Right Angle Printed Circuit Termination

A popular variation of the D-Sub family is the right angle contact termination. Jerrick can provide the 90° contact bending for signal and some power pins (non standard arrangements). We also supply two configurations of shells, shown here in both 2 row and 3 row versions. While the original design relies on the contacts soldered to the board to support the assembly, the customer can use the newer board mount style for added mechanical integrity in vibration.

2 ROW CONFIGURATION (9, 15, 25, 37 Contact Arrangements)

2 ROW BOARD-MOUNT CONFIGURATION

3 ROW CONFIGURATION (50 Contact Arrangements)

3 ROW BOARD-MOUNT CONFIGURATION
